

## Mechanical Engineering Position

Be part of a team of dedicated engineers who design and build Wet Process, Cleaning and Support Tools for the Semiconductor, MEMs, Photovoltaic and Compound Semiconductor Industries including Universities.

The position requires use of SOLIDWORKS 3D modeling as well as engineering principles. You'll prepare mechanical and plumbing designs and fabrication drawings for our products and develop new products as part of a team. Opportunities to test equipment and try out new designs. Fun and exciting opportunity. Competitive salary commensurate with experience and great benefits.
